A cute little baby turtle that looks great sitting up on two legs, standing on all four, or just laying down to get some rest.

This is an easy print-in-place that has been carefully designed to require no supports, and (at just 6 cm long) it's a fun size that only requires 14 grams of filament and prints quick. In addition to the STL, I've also included the 3MF and 'gcode' files I used to print the ones in the pictures.
