updated 28. 6. 2023 | published 28. 6. 2023

Summary

I decided to add a bit more of a sleek design with rounded edges and a place to route and hide wires.

This is an edit of Jamons design which you can find here. <https://www.printables.com/model/232880-ender-5-easy-maintenance-fan-duct-dual-5015/related>

So all credit to [@jamon_268411](#) ! Thank you!

It liked the design since it was easy to replace with my stock ender 5 plus head. I decided to add a bit more of a sleek design with rounded edges and a place to route and hide wires.

Theres a version without "Kregme" if you would like it without.

If you are dying to get your own nickname on it and cant do it on your own, we might be able to figure that out.

It also includes a mount for BL Touch. I had to lower my probe approximately 2mm more than this, but you might be able to configure it without a spacer.

This is a 3-4 hour print, depending on your settings.

This remix is based on

Ender 5 Easy Maintenance Fan Duct (Dual 5015)
