Summary

SCAD that provide a parameter-based generic mount to attach to poles via straps.

[Gadgets](#) > [Other Gadgets](#)

Tags: [velcro](#) [batterypack](#) [battery](#) [telescope](#) [strap](#) [pole](#)

The scad file is parameterized to allow setting the dimensions of the object to be held, the diameter of the pole to mount it to, the dimensions of the straps to use, and how thick the walls should be.

Uploaded is the model I primarily designed this for, a mount for my RAVPower battery bank to attach to a 44mm telescope leg. I can generate more if needed, just shoot me a message.
