### Summary

A simple 1x1 made to hold this Hex Scraper - <https://www.printables.com/model/122894-hexscraper-printbed-scraper>

I got tired of my scrapers laying on the workbench so made this 1x1 to hold them. This 1x1 will hold 2 of these scrapers (<https://www.printables.com/model/122894-hexscraper-printbed-scraper>)

I printed this one in PLA with 0.2mm layer height, 3 walls, 10% infill and 4 top and bottom layers. No supports needed unless you want to use the screw holes. In that case I'd recommend painting some in those spots.

Created with help from the parametric FreeCAD gridfinity file that I've linked as a remix.
