Simple tape dispensers in the form of the legendary beer crate model

Tape dispenser for two tape spools side by side. You can easily store and use 2 types of tapes for example. Model contains 4 parts:

- Crate beer
- Lid with cutter part
- Insert
- Axis

You will probably understand how to assemble from the attached photos :)

It's designed for tape with total radius of about 5 cm, inner radius of about 2.5 cm and width 2 cm. But as you can see, there is some space around, so it will be definitely useful for more similar tape types.

Printing:

- PLA or PETG filament
- Without any support
- 0.20 layer
- Infill 15 % or more

Check out also my other "beer crate" model - **Multi-battery stackable beer crate** - which help you organize all types of batteries efficiently :)

Enjoy!

Thanks! This is remix of great **beer crate model** from **CAD-Guy**. Also kudos for original creator of this beer crate concept **Jarda K 66** - check out their original models too!

This remix is based on

Customizable & stackable beer crate for all types of batteries

by CAD-Guy

closed inlay for battery beer crates

by Antimaterie

Safety lid for stackable beer storage box for AA batteries
