NOTE: I failed to get a good photo before my kids drew on them with marker, but I promise they look great!

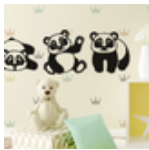

From the original files by [@mishkin2](#), I put screenshots of these into Fusion and splined them manually. (I promise I tried much more sophisticated methods first...)

Each one is 2 mm of white under 1 mm of black. I started with only 1 mm of white but found it was too transparent. The black could probably be thinner too if you care, but I wanted to make sure to limit white space on the edges. If you want them thinner or thicker or whatever, I've included the Fusion files below as a .zip.

I, personally, chose Archimedean Chords, because I think they look nice, and I had some issues with ironing. (This was back when ironing first became available in PrusaSlicer, so it might be better now, especially if you've calibrated your printer better than I have mine.)

Anyway, my kids love these, and maybe you (or your kids) will, too!
