[diskholder](#)

MY ACCOUNT HAS GLITCHED! This is actually my design but I can no longer access my original account. W(ii) needed a solution to wii disks lying on the shelf disorganized. So I came up with this. It took me a few minutes to design, and around 4 hours to print. Just remember that some wii disk cases are different widths, so no all disks will fit snugly into this print. DID YOU KNOW? This doubles as a disk holder for any cases. DID YOU ALSO KNOW? In the new prusaslicer 2.6, you can add text to a surface. So just use that function on the face of the stand, and write whatever you want.
