Using with Harbor Freight's [Precision Pliers 6pc set](#).

Took the 4 plier model from [Mansdask](#) and expanded it to allow for 6 pliers. Then went for extra credit with side & back walls. I then used a generic pegboard plate to superglue onto the back wall of the model, this allowed me to get the alignment right without precise measurements during the modeling process. Put superglue onto the plate, put the plate up on your pegboard, then press the model onto the plate.

I've included the 6p model without the side & back walls in case you just want to set it on your desktop.

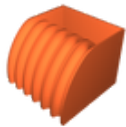

This remix is based on

Desktop stand for pliers
