updated 23. 7. 2023 | published 23. 7. 2023

Summary

Just a thin slot in the middle to hold the pliers. For use with 1" pegboard.

This is a bit different than your typical pliers holder. A little, thin slot placed at the plier's joint holds it just fine. I suggest printing it upright for increasing strength of the thin slot. Supports & brim are necessary.
