This is a Honeycomb Storage Wall Mount for a Netgate 2100. I remixed this model in Tinkercad from a design posted by [nickandhiscat](#) on Thingiverse (<https://www.thingiverse.com/thing:5452122>).

To make it possible to install the gateway the mount is printed in two parts and assembled using two M3 Screw and Nuts. Supports will be needed to print this.

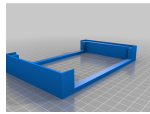

Update: Added Side A v2 - A slight cutout was added to account for the power supply plug. (Please note: I used rough measurements for this and have not printed/tested v2 myself.)

This remix is based on
