Was a bit bummed to lose my PSU Mounted tool holder when I upgraded to a Dual Z, so I decided why not mount my tools in the space behind the new stepper.

There are 3 STL files here, one has the whole rack that can be printed as a single file, or you can print the top and base as separate pieces and simply snap them together. I printed them separately and the top fit on snugly without the need for any adhesives but your mileage may vary.

Print Settings

Printer Brand:

Creality

Printer:

Ender 3 Pro

Rafts:

No

Supports:

Yes

Resolution:

0.2
