This is remixed from Megahertz604 desk mounted version <https://www.thingiverse.com/thing:4242885> I liked the look of it but wanted to mount it to my monitor instead. As a result I had to add some rigidity and fill in the bottom to be able to hold the weight of a set of headphones without falling or breaking. I was able to securely mount this with headphone in it without adhesive to my Viewsonic XG2402, but your results may vary.

I'm new to 3d printing and the remix is a bit rudimentary so feel free to remix.

Print Settings

Printer Brand:

Crealitiy

Printer:

Ender 3 Pro

Rafts:

No

Supports:

Yes

Resolution:

.12

Infill:

50%
