This is a lower tray for the nespresso essenza mini (round variant).

with this you can put bigger mugs under it and not worry about the drips if you forget to put the original tray back.

the cap is a tight fit, if you plan on removing the whole tray without having to take the cap off download cap v2. with V2 you can remove it easier.

i used PLA for this but it can also be made with PETG for better resistance.

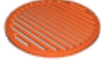

for Printing: print the cap upside down, and use supports for the tray.
