Scale accessory for Axial SCX10 III Jeep JLU Wrangler. Roof rack that can be mounted in the front, middle, or rear of the roof. There are two mounting options: either using double-sided adhesive tape or by screwing it directly through the roof.

The 3D model is designed to be printable without the need for support material. The holes are intentionally not perfectly round but have a slight pointed shape in one direction. When printing the “mount”-model, the point should be facing upwards to achieve the best results with the holes.
