This is a compact, sturdy and easy to print slingshot for adults.

I've seen a kid with a slingshot and immediately had the urge to print one myself. I used it with old coffee-beans and they easily flew around 20+ meters.

I printed it in PLA with 4 perimeters and 30% infill. It's pretty sturdy and I doubt that it would break.

I used two 140x5x1mm rubber-bands and 20mm webbing for the sling.
