Summary

Did you buy a pack of 8x3mm round magnets for your extruder visualizer, but only use one or two?

Did you buy a pack of 8x3mm round magnets for your extruder visualizer, but only use one or two?

This is a simple filament clip that uses 2 8x3mm round magnets to hold the end of your filament to the side of the spool. May require a drop of superglue to hold the magnet in place. May not fit certain spools (in particular, new spools that don't have much room on the side of the spool).

Print instructions

I printed mine in PLA at 0.2mm with 15% infill. The model is fairly basic so it should work with most materials and resolutions.

Optionally add a drop of superglue to keep the magnet in place.
