Summary

Removable tray that can be used as insert in the bin with dice. No need to use a separate bin for the trays.

[Toys & Games](#) > [Board Games](#)

I didn't like that I needed to use a separate bin to store the removable trays that come with the original design, so I created a new tray that fits in a bin with dice when the box is closed. I also made the inside of the bins a big bigger in order to fit the trays. Obviously this is only for the large version. I made it for the chamfered version with the short tabs. Can be made for the other versions on request.
