Summary

Nest style shelf with focus on reduced plastic usage and maximum stability for home and office

[Art & Design](#) > [Wall-mounted](#)

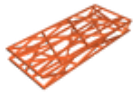

Tags: [shelf](#) [home](#) [nest](#) [practicalprint](#)

I have grown tired of printing shelves that waste plastic or take a long time to print. This design from my Extremely Practical series balances the strength and low-density requirements of the price anxious. Featuring a nest style with embedded structural elements, this shelf is great in the home or office.

Designed for a 350mm print bed, but can be scaled per your requirements.
