updated 29. 6. 2023 | published 29. 6. 2023

Summary

A wind-proof card holder designed to hold a single card from the board game "Coyote".

Tags: [holder](#) [boardgameaccessories](#) [card](#) [boardgame](#)

Printed at 0.3 mm layer height but you may use a smaller number if you want more clarity at the top where it is very slightly curved.

Infill that I used is 10% Gyroid but I think even 5% should work fine.

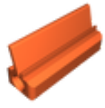

This model is designed to be wind-proof in one-direction only but it will still catch the card on the other direction so that it is unlikely to fall out.

Additional hardware (Optional):

- 1) 2x M5 16mm screws and nuts
- 2) Washers (and super glue)

If you want to make the base heavier, you may add 2 M5 screws and nuts to the side by pressing them into the hole on the side. If you need it to be heavier, you may glue on washers to the bottom.
