Summary

Larger knob for AMS Storage Drawer.

[3D Printers](#) > [Accessories](#)

Please be nice as I was asked to upload this file and I have VERY limited skills. I created this in Tinkercad since I found the original knob to be rather small and hard to grab on to so I created a basic knob in Tinkercad and it worked perfectly. I printed this knob with PLA on my Bambu X1 Carbon using the Cool Plate and .20mm Standard Bambu presets. 2 walls is all you need as I found out if I printed the knob and drawer front with 3 walls, it was near impossible to screw it to the drawer face. Best wishes!
