### Summary

A quick fix for an annoying problem of a missing clip on a 2 pin DIN that is commonly used on powered furniture

Tags: [fix](#) [furniture](#)

I got tired of the broken clip on my power recliner and the missing clip on my powered standing desk, so I made this and printed it. Isn't it fun to 3d print fixes for broken things?

Due to it's small size I printed it out of Anycubic basic resin and it seems to surprisingly work fine.
