Summary

Pint glass coaster which collects condensation. Suitable for a standard British pint glass.

[Household](#) > [Home Decor](#)

I needed a coaster for my pint glass which used to condense and leave puddles of water on my desk. Design goals were:

1. Had a lip to catch all the condensation
2. Right size for a pint glass
3. Easy to clean
4. Ridges inside so the condensation would not stick to the coaster when you lifted the glass off.
