Tags: [filamentguide](#) [ledmount](#) [led](#) [anycubickobra](#) [anycubic](#)

This is an LED mount for the Anycubic Kobra Neo and Go. It slots into the top bar with a friction fit and includes a filament guide. There is also a version without the filament guide for the Go.

After printing, you can super glue the two pieces together but it isn't required. You may have to sand the edges to get a perfect fit.
