Summary

Cable clip for 2040 extrusion. Works with the non-standard Z beams on Anycubic printers.

This clip can be rotated into place without removing the top bar. They stay in place but can be easily slid into position. Will likely work with the Kobra Go and any printer with 2040 extrusions. Step and Fusion 360 files are included.

Check out my LED light bar for the Kobra Neo here: <https://www.printables.com/model/516092>
