Summary

A simple lid for the Thermacell Patio Shield

[Household](#) > [Outdoor & Garden](#)

Tags: [insect](#) [pestcontrol](#) [mosquito](#) [mosquitocontrol](#)
[thermacell](#) [patioshield](#)

We have several of these highly effective little devices, but unfortunately only one of them came with a lid. As it tends to accumulate a little residue on the surface during use, it's nice to be able to cover it before putting it away. This design will snap onto the Thermacell protecting the top, and keeping anything that brushes against it a little cleaner. Just make sure it's cooled off first 😊

Printing Tips:

- Print with 3 Perimeters
- Print with the “Bug” side on the build plate (No supports required)

Printed in Atomic Filament PETG
