Summary

Give a flyer the second chance! Unwanted flyer can be stored in this organiser to be reused later.

[Household](#) > [Other House Equipment](#)

Give a flyer the second chance!
Unwanted flyer can be stored in this organiser to be reused later.
Advantage of this design is that it can be used for example under the kitchen desk or in wardrobe.

Of course this print can be used in totally different way and I would be happy to see other solutions :-)

Print instructions

Design settings

For this project I used PrusaSlicer Modifiers which created pattern from photo. This pattern is actually a triangle infill with bottom and upper layers set to 0.

I've uploaded .3mf files where you can create your own design.
It is super easy :-)

In PrusaSlicer (Advanced and Expert mode) just set infill pattern and infill

density to create a personalised design.

(note: Not every infill pattern is suitable for this organiser eg. concentric)

For more info learn from [this video](#) made by Jo Prusa.

Print settings

Material: PLA, PETG, etc

Layer height: 0.2

Supports: Yes (only for bottom and side panel)

Overall infill: 7%

Brim: not needed

Printing Plan

For one section organiser you need to print:

2x Frames (Front Frame, Rear Frame),

1x Side Panel

1x Bottom Panel

2x Brace.

For two or more section you need just to multiply above mentioned parts by number of sections except frames files. You always need Front and Rear. Two section organiser require - 1x Middle frame, three sections - 2x Middle frame etc.

Model files

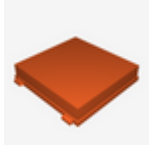

6-brace.3mf

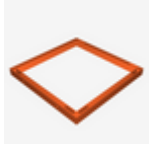

2-middle-frame.3mf

3-rear-frame.3mf

5-bottom-panel.3mf

1-front-frame.3mf

4-side-panel.3mf
