Summary

So the refill tube in our main toilet would come out of the fill hole.

Tags: [toilet](#) [kohler](#) [aquapiston](#)

So the refill tube in our main toilet would come out of the fill hole. The result was the bowl would fill with substantially less water. Got tired of having to take the top off the tank and reconnect it, so I designed this clip for it.

Uploading the Fusion 360 file in case anyone needs to mod for their sitch.

Print Settings

Printer Brand:

MakerGear

Printer:

M2

Rafts:

No

Supports:

No

Infill:

30%

Notes:

I printed at 30% but you could probably get away with less. I wasn't sure how well the clip side would latch.
Also, supports are maybe for the tube hole.
