Summary

A wallmount bottle holder I designed to use G2 bottles as soap pump reservoirs.

[Household](#) > [Bathroom](#)

Tags: [bottle](#) [soap](#) [holder](#) [reservoir](#) [g2](#) [pump](#)

We prefer to be able to pump hand soap in the kitchen & bathroom, rather than having bars of soap laying around getting gooey. I installed soap pumps in the kitchen and 2 bathrooms. Unfortunately, the necks of the included bottles broke off rather quickly (the plastic was quite brittle). I designed this holder to take Gatorade G2 bottles and hold them the right distance from the wall to be under the soap pump. In 1 bathroom the wall was further back so I had to design an extension piece. I actually designed 2 extensions; both are included.

It's not an elegant design, but they're under sinks, out of sight, and they get the job done.

I recommend printing the bottle holder & wall mount sideways, and the extensions upright.

The wall mount can be adhered with double side tape, 3M Command Strips, or you can drill a couple of holes and screw it to the wall.
