Summary

Stick for mounting Thing plus C with single, double or triple rows of QWIIC modules.

Tags: [sparkfun](#) [qwiic](#) [stick](#) [mount](#)

This is a remix of Sparkfun Module stick that has mounting holes for Thing plus C (it has narrower screw holes).

I have added single, double and triple version for bigger projects and adapter for mounting QWIIC micro oled module.

This remix is based on

Sparkfun Module Stick.
