Summary

A work stand for model rockets and high-power rockets

[Hobby & Makers](#) > [Mechanical Parts](#)

Tags: [highpowerrocketry](#)

A work stand for rockets, like the stands most people make from PVC pipe, but more nifty. This is sized to use the entire print volume of my Prusa Mk2S, about 25 x 20 x 20 cm. I recommend the use of adhesive LRFs (little rubber feet) to prevent it from sliding around on your work table.
