Tags: [star](#) [low](#) [lowpoly](#) [keyring](#) [remix](#) [heart](#) [remixed](#)
[tinkercad](#) [elephant](#)

This is a low poly elephant made in tinkercad starting with the base elephant from licky lauda. It has a hole for a keyring and a few extra bits and pieces. The example was printed on an anycubic photon mono in elegoo transparent red resin. No supports but if print in fdm i recomend supports so the trunk and keyring hole doesn't break.
