Summary

Replacement for a missing blade safety latch.

Tags: [safety](#) [ingento](#) [laseercutter](#) [papercutter](#)

My Ingento GT paper cutter was missing the latch that holds the blade down against the table between uses. Replacement parts are not available, so I decided to design a new one.

I cut the latch out of 1/8" black acrylic using a laser cutter.

I used a #8 truss head screw and a short 1/4" OD spacer to mount the latch to the paper cutter frame.
