[Costumes & Accessories](#) > [Props](#)

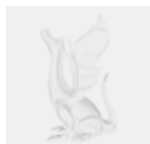

Just some remixed parts for the 1:1 portal radio made by Alex I on my mini factory, which I made easier to print on Ender 3pro, as well as a hole in the back for cords and a holder under the button hole for a clicky keyboard button.

The ones I have here are ones that I have edited, any missing ones are on the original site. Not all are necessary IMO, depends on how you are making it.
