### Summary

A full color image of Superman converted for printing with HueForge

[Art & Design](#) > [Other Art & Designs](#)

Tags: [comicbooks](#) [multicolor](#) [superman](#) [hueforge](#)  
[multicolored](#) [superhero](#) [comics](#)

Image generated via MidJourney, converted and optimized for color printing in HueForge.

Print at 100% infill with a layer height of 0.08mm with a base layer of 0.20mm

If you scale along X/Y axes, ensure that Z remains at 100% height or the filament swap instructions will do you no good.

You may, of course, use other brands of filament, but colors and blending may not match my example print exactly.

Filaments Used:

Hatchbox True Black PLA

Bambu Red PLA Basic

Hatchbox Blue PLA+

Hatchbox True Yellow  
Hatchbox Beige

Swap Instructions:

Black until layer #10 at 0.92mm

Red until layer #17 at 1.48mm

Blue until layer #23 at 1.96mm

Yellow until layer #34 at 2.84mm

Beige for the rest.
