Summary

The original design by Ron was great, but there were a few minor issues/ additions I incorporated into this remix: 1)...

0.44 hrs

1 pcs

0.25 mm

0.40 mm

PET

8 g

Prusa
MK2.5/S

[Household](#) > [Other House Equipment](#)

The original design by Ron was great, but there were a few minor issues/ additions I incorporated into this remix:

- 1) re-oriented part for proper print orientation
- 2) netfabbbed the many mesh errors away
- 3) removed the bottom 0.1mm which had some inconsistencies
- 4) removed some unnecessary top layers
- 5) provided pre-sliced GCODE for printing in PETG (MK2.5/S)
- 6) scaled up slightly to maximize print bed space
- 7) added reduced version for Prusa Mini (Thanks, Plunning!)

Print instructions

I'd recommend something like PETG, ABS, TPU or other DURABLE filament so the shaft doesn't snap off in your drain. Happy printing!
