Summary

The raspicamcover_nolense model from Articulating Raspberry Pi Camera Mount...

[3D Printers](#) > [Accessories](#)

The raspicamcover_nolense model from Articulating Raspberry Pi Camera Mount (<https://www.prusaprinters.org/prints/3407>) did not fit my Raspberry Pi Camera 2 (rev 1.3). The lens hole was about 0.045" (1.14mm) lower and would not align with the stock lens.

Thank you Sneaks for providing the step file for the camera cover as this saved a lot of time on my part to adjust the model. I adjusted the lens hole feature up by 0.045" (1.14mm) and re-printed with success.

Print instructions

Print this how you would the original.
