updated 4. 7. 2023 | published 4. 7. 2023

### Summary

1-6 slot versions of skadis holders for 12 or 14mm wide small pliers

[Hobby & Makers](#) > [Organizers](#)

Tags: [skadis](#) [pliers](#) [holder](#)

this is clearly inspired by the [mini pliers holder for pegboards by MD3D](#) but I started it from scratch again for skadis and added a couple versions to it.

first of all measure your pliers and decide between 12 and 14mm wide openings in the holders.

there are versions for a single tool up to a set of six to choose from furthermore.

and last to pick, the needed amount (1-3) of hooks depending if your skadis board is colored black/white (+ on the hook) or not (- on the hook).

all versions (including hooks) are printing without supports when placed like in the files, had good results printing in PETG at 0.2 layers.

would suggest to print everything quite strong with 3-4 perimeters and 25%+ infill to keep stability while holding up to 6 pliers.

there is a little tolerance between holder and hook for a easy slide in, a drop of glue can keep them in place finally.

Update: strengthened the parts a little for higher stability and supporting the weight of up to six pliers better.

as always I highly appreciate every like, rating or make, same for remixing and sharing.

donations will be forwarded to [sea-watch.org](https://sea-watch.org)
