Summary

This is another order we recieved for a mount that attaches to the back of the monitor for your phone.

[Gadgets](#) > [Photo & Video](#)

Tags: [holder](#) [stand](#) [mount](#) [phone](#) [cellphone](#)

This item is from a customer who wanted a bracket for their cellphone that will mount the phone to the back of their screen for use as a webcam or for video calls that make use of the phone camera. We designed 2 different versions one with a swing arm and one with a normal bracket, the non swing arm feature a small bolt that is not required that tightens the mount as well as controls pitch of the phone.

If you like the work I do, feel free to support me by [buying me a coffee](#).

Print Settings for both

* Printed in PLA (except for the screw / bolt, thats printed in PETG)

* Supports will be required for good finish.
