

HSW - 3/8 Microphone Bolt Insert

Winter Gray

[VIEW IN BROWSER](#)

updated 30. 6. 2023 | published 30. 6. 2023

Summary

A Honeycomb Storage Wall insert with a 3/8" bolt attached to it for microphones.

[Hobby & Makers](#) > [Organizers](#)

I was wanting a place to mount my old AT2020 USB instead of just putting it into a drawer or a box, and I have already been printing the Honeycomb wall, and thought "I wonder if there's a way to put it on the organizer wall." So I went looking and was surprised to find that there wasn't already what I was needing.

Well, after a little bit of mesh-mashing in Fusion360 using the [Microphone Bolt](#) by [@mccrane](#) and the single empty insert from [@RostaP's Honeycomb Storage Wall](#), I got what I needed. Honestly they were perfect for each other with hardly any adjustment.

Printed vertically (screw threads up) and it seems to be holding up, but if it breaks I'll take this down and remake it.
