Summary

Put these on prints that doesn't have much contact with the build plate, it will stick much better!

Put one of these on the corners of your print to better secure it to the build plate.

These ears are a must-have on tall prints that doesn't have much contact with the build plate.

Just drag the STL to your print and cut it off with a cutting tool when the print is done.

To this:

Make sure to “split” the parts when you have mouse ears.

**It should
look like
this under
the print.**
