I searched for an enclosure for my MC 1022 but found nothing, inspired by Vienna3D's Case for the MC 102 (<https://www.thingiverse.com/thing:4292874>)

After making this, I wanted it to stand on my Desk and get the cables somewhat sorted and out of the way.

So I designed the Stand in which the Nobsound mc1022 incl Case slides in and gets secured by the four original screws.

To make it all as neat as possible, I designed the base to snap on an ifi ZEN DAC which I use.

But it stands fine on its own.

All this was printed on a Prusa Mk3s using Prusament Ultramarine PETG.
Have Fun.

Print instructions

Prints straight forward without any supports.
