This is a headphone stand with Beerus the god of destruction from Dragon Ball Super, it's a model that commands attention and respect just like Beerus.

This headphone stand comes in 2 parts, the actual stand with the figure and then the headphones holder to slide onto it and can be glued on if so wished.

Been made aware that these do not fit some printers, as such I have added a modular version.

If you like the work I do, feel free to support me by [buying me a coffee](#).

The top part where the headphone rests is loose by design allowing you to have your preferred headphone rest angle - this does make the use of glue a requirement.

Printing settings:

- * Printed in PLA.
- * As for infill I suggest printing the bar leading to the headphones as 100% and the rest can be printed with any infill.
- * The model does need support to print correctly.
- * layer height is 0.16 for details but can be printed with any layer height.
