This is a headphone stand with Goku in Super Saiyan 4 from Dragon Ball GT, it's a model that encourages truth and determination just like Goku. This headphone stand comes in 2 parts, the actual stand with the figure and then the headphones holder to slide onto it and can be glued on if so wished.

Been made aware that these do not fit some printers, as such I have added a modular version.

If you like the work I do, feel free to support me by [buying me a coffee](#).

The top part where the headphone rests is loose by design allowing you to have your preferred headphone rest angle - this does make the use of glue a requirement.

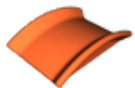

Printing settings:

- \* Printed in PLA.
- \* As for infill I suggest printing the bar leading to the headphones as 100% and the rest can be printed with any infill.
- \* The model does need supports to print correctly.
- \* layer height is 0.16 for details but can be printed with any layer height.
