Summary

A counter for tracker things over the course of a week.

This is a counter which can be mounted on your wall to keep track of the number of times you do something over the course of a week. I use it track my reps on the pull up bar.

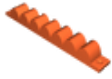

Designed to work with 5mm rod and #6 screws. The rods are a tight fit so if so make sure your printer is well calibrated.

There is a left and right side, though if you don't like the left side you can just use two of the right side and everything should still fit and be symmetrical.

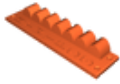

I printed the beans without support and they came out nice. They are a little tight on the rods but sort of get looser as you use it which I like.
