Summary

Phone stand with support for circular wireless charger - (OpenSCAD adjustable for size)

[Household](#) > [Bedroom](#)

Another phone stand with slot to hold wireless charger in place. STL file suitable for a Pixel 6 with Amazon-brand charger, but OpenSCAD files provided for easy adjustments

I'm happy with the size I have now, but if I were to re-print it I'd probably make the charger sit a little higher on the phone as it puts a bit of tension on the charger cable (unless you have a 90 degree cable), also a little lip at the bottom of the phone stand would help keep the phone in place if the charger wasn't there.

Printed in PLA with 3 walls and support - no special settings.
