## Summary

Slotty is a modular storage system. All components slot together to create a modular storage system to suit every need.

Slotty is a modular storage system. All components slot together to create a modular storage system to suit every need.

A modern design fit for your workshop/kitchen/living room/office space. Print as many as you need and in any colour you desire.

There are 3 Main compartments with a variation of drawer options. Each main compartment measures approx 10.5 x 10.5 x 10.5 cm

I look forward to seeing your configurations :-)

## Print instructions

PRINTING PARAMETERS:

No Supports are required when printing any objects  
Print using 3 Walls/Perimeters

At least 5% infill

3 bottom layers and 4 top layers.

I used a 0.4mm nozzle. All parts are printed at 100% scale and designed to "fit as is" although all printers are different so you may need to make slight adjustments if required.

The add-on handle can be used on all the drawers if required but not necessary. All drawers have a built in handle.
