updated 30. 6. 2023 | published 30. 6. 2023

## Summary

A very rough mod for PiTFT50 V2 to the Anycubic Vyper

[3D Printers](#) > [3D Printers - Upgrades](#)

A very rough mod for PiTFT50 V2 to the Anycubic Vyper, it uses the bracket from the original screen for the left or right side of the printer (the left side is under a different angle and is mounted on the top side of the bottom extrusion with M5 T-nuts), you'll also need two M3 heat inserts.
