Summary

For the people that hate wearing badges on a neck lanyard, this holds your employee badge magnetically on your shirt.

Inspired by the Star Trek magnetic shirt badges, I created something I can actually wear at work. This is for the people that hate wearing a neck lanyard.

Your employee badge goes into the holder, the backing plate goes inside your shirt, and bob's yer uncle. The side-clips are small enough to not obscure any of the security information.

It needs 12 of those 8mmx3mm circular disc magnets. My model doesn't need glue. I stacked the magnets up and pressed them into the model so they'd all be the same "direction".

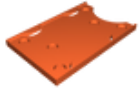

I may or may not have told people "oh it's from the company webstore..." but then I might be a little evil...

It's simple to print:

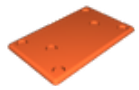

- Support on build plate only

- Snug supports
- 15% rectilinear infill
