Summary

Joker's motto

[Art & Design](#) > [2D Plates & Logos](#)

Tags: [joker](#)

Overview

I found that picture on internet and I had to bring it to the world of 3d printing. I don't know who is original author of this picture but it is great.

Check this model on youtube

<https://youtube.com/shorts/1cYnGG6r1sA?feature=share>

Printing

Model printed with 0.4 mm, nozzle, 0.2 layer height, X , Y scaled down to 70 %, Z is 100%.

Instruction

When Z is 100% and layer height is 0.2 mm change color at layer 1.2, 2.2, 3.2, 4.2.

Color order:

1. Background - black
2. Eyes and mouth - red
3. Teeth - yellow
4. Face - white
5. Hair - green

Update

Added spring Joker. Just stick one end to the Joker and push the other into the base. This is only a concept because I figured out that spring printed with PLA after some time bends and don't keep straight shape so I won't develop this idea more.

Have fun
