Summary

Infill patterns sample cubes with a stand

[3D Printers](#) > [Test Models](#)

Tags: [infillpattern](#) [infill](#) [infillpatterns](#)

All the 17 infill patterns in sample cubes and a stand with patterns names on it, all the samples are made in 15% density.

With this models you can have a real geometric representation of each pattern and can test the strenght without walls exception for the lightning one.

The stand is divided into left side and right side, you can paste them or just tile them.
